

WHAT IS ACCEDE SMS

ACCEDE SMS stands for **Automated Command Execution and Data Delivery via Short Messaging System**.

ACCEDE SMS is a system that makes it possible for businesses – Corporate or SME – to run text- or SMS-based business applications similar to 4-digit services similar to 2366 2331 offered by Smart , Globe and Sun to select companies only.

Now you can have access to the same technology faster, at lower cost, without need for extensive documentation requirements such as Business Proposals and Feasibility Studies. Even better, text sent to standard 11-digit numbers of **ACCEDE SMS** is just a **regular text** – Texters are not charged P 2.50 or P 10.00.

Best of all, there is no equipment or computer hardware or software to develop, license or buy – we have done all that for you: we have invested in setting up and centrally-hosting the **ACCEDE SMS** core running 24x7 in our secure PEZA IT Zone facility in Metro Manila.

We are offering you a unique opportunity to take advantage of our **ACCEDE SMS** infrastructure for use for your Business Applications.

WHAT CAN IT DO FOR YOU?

Because the **ACCEDE SMS** service uses the combined network coverage of all 3 major networks, it is available everywhere. It gives you the power to harness the nationwide presence of cellular phones for your business needs.

Here are just a few examples of SMS/Text applications:

- Announce Product Updates, Special Offers, new stock arrival to all your Dealers and Customers cost-effectively. *No need to dedicate staff to call or text all day.*
- Maximize and complement your tri-media advertising – Text invitations to read articles or watch shows featuring your Products
- Run an Opinion Poll on your Readers or Subscribers
- Conduct a Customer Satisfaction Survey
- Have a *consistent* automated responder to requests for information on your Company, Product or Service: packages, options, offers and even driving directions.
- Automatically send out timely Birthday Greetings to customers, reminders on membership expirations

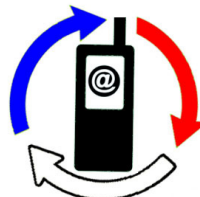

ACCEDE SMS can also be customized for your specific application needs and enable you to do just about everything that you thought possible only if you are sitting in front of a computer at your office.

**ACCEDE SMS GIVES YOU INFORMATION
ANYTIME, ANYWHERE**

ACCEDE SMS is a proprietary system developed by Digital Visions Philippines © 2007 Digital Visions. All Rights Reserved www.digitalvisionsinternational.com
